PURPOSE-BUILT STORAGE SYSTEMS

Space-saving, personal use, bulk and heavy-duty, highly secured - no matter what the storage application, our solutions are designed around each unique need. From distinctly shaped artifacts to rare books, bulk supplies to confidential records, and high-security weapons to medical instruments, we offer a vast array of storage products to meet your needs. Our storage consultants will help you select the most appropriate product, develop a space plan, and then help you install and implement your workspace solution.

PRODUCTIVE, APPEALING WORKSPACE DESIGN

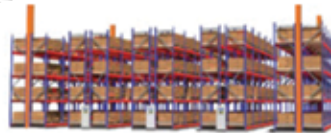

Technical furniture, modular millwork, ergonomic accessories - we provide an array of interiors products that build productivity into your workplace. From break rooms to laboratories, mailrooms to reception areas, and nurses' stations to dispatch centers, we provide planning expertise to help you design a functional, efficient work environment. Space planners will work with architects and designers to fashion a perfect workspace solution to fit both your functional and interior design needs.

MATERIAL MANAGEMENT SOLUTIONS

Shelving, racking, carousels, conveyors, mezzanines, ASRS systems, and more - our advanced material handling systems will bring efficiency, higher throughput, and lower costs. From warehouse solutions to manufacturing material flow and distribution and fulfillment to storage automation, we bring the material handling products, design expertise, and installation knowhow to implement a complete system. Project managers will cover every detail from conceptual CAD drawings to installation timelines.

A STANDARD OF SERVICE EXCELLENCE

Project planning, design, project management, installation or repair – you can count on our skilled technicians and professionals to support your project from start to finish. From document management to workspace planning and warehouse automation to complete logistics solutions, we will help you plan and implement your transition. Our experienced and rigorously trained professionals will worry about the details so that you can focus on your day-to-day needs.
