We offer a wide range of office and business storage solutions including movable casework, high density shelving, automated filing systems, smart lockers, document scanning, and much more. These storage systems work to increase your business productivity and efficiency while saving you space and decreasing overhead costs.

High-Density File Shelving

High-density shelving cuts your storage space in half! Store files, folders, binders, record boxes, and supplies more compactly and enjoy improved organization and file accessibility.

Movable Casework

Casework can be designed to your exact specifications and provides the look of built-in furniture without building modifications, and can easily be relocated, reconfigured, and reused.

Electric Filing Cabinets

Streamline your file system with the push of a button. Save space and ensure ADA compliance. Requested items are delivered to an ergonomic work counter automatically, eliminating the need for walking and searching.

Keyless Smart Lockers

Smart lockers provide employees with a secure space to store belongings during working hours. Alternatively, smart lockers can be easily set-up for secure delivery and pick-up of packages and parcels with automatic alerts.

Document Scanning

We provide on-site or off-site document imaging services in our secured location with HIPAA and CJIS compliant staff and processes.

Fold Down Seating

Fold-down seats mount to the wall or floor, folding up to just four inches when not in use. Ideal for patient rooms, conference rooms, reception areas, and other tight spaces.

SOUTHWEST SOLUTIONS GROUP

Mailroom Furniture

A wide variety of mailroom furniture and mail sorters are available to keep your space organized. These solutions can be designed and factory-made to your exact specifications and shipped directly to you.

Movable Walls

Unlike drywall construction, these walls can be taken down, moved, or added to at any time to create flexible office spaces and partitions. If you relocate, the walls simply move with you.
File Box Storage

File box shelving allows you to manage your space and organize your business's boxes and archival records efficiently. High capacity racks can store even the heaviest boxes for bulk storage.

Library Shelving

Library cantilever shelving organizes and stores your books, binders, and other files efficiently and allows employees to find and retrieve needed items quickly.

High-Density Storage

High density shelving is used for more than just filing; it can also store boxes, supplies, binders, multimedia, and other business materials in less space than static shelving.
