

Factsheet

Kardex Megamat 115/120/125

Kardex Megamat 115/120/125

The Vertical Carousel Module (VCM) Kardex Megamat 115/120/125 is an efficient office system. Using the goods to person principle it provides quick and precise access to thousands of media types. It is equipped with a series of carriers that attach to a chain drive in multiple, fixed locations. A motor powers the carriers to move in a vertical loop around a track in both forward and reverse directions.

Offering advanced safety and performance features, the Kardex Megamat 115/120 /125 is an ideal storage solution for various information media like folders, card files, videos, CDs, DVDs and all other digital and paper documents.

From patient archives to city-zoning, industries are challenged by paperwork and complex retention laws. The Kardex Megamat 115/120/125 can replace approximately 16 four-drawer filing cabinets and double productivity while offering workers an ergonomic and safe filing experience (e.g., eliminates the need for ladders, strenuous bending and lengthy search times).

Application range

Storage of documents and files

Often used in the area of services and administration (e.g., in offices or banks) the Kardex Megamat 115/120/125 facilitates the long term storage of confidential documents and provides the needed media quickly with the push of a button. With files piling up and no room to expand it is the ideal solution that requires minimal footprint and replaces up to 16 four-drawer filing cabinets.

Storage of confidential documents

The storage of documents or evidence in the area of military, government, hospitals or other public institutions is subject to strict regulations. Many of them choose the Kardex Megamat 115/120/125 to comply with legal requirements and retention laws. It minimizes security breaches and enables a digital transaction history. Kardex is also considered as an approved prime source for GSA's products and solutions.
