

Easy to use wall mounted Rollaway Cart

Shown above is the Wall Mount Rollaway Cart, model TC-1000.

Why does overhead storage make sense?

1. Keeping small inventory items together and stored safely on regular shelving is not always the best idea. Things can get moved, dropped or even walk away.
 2. When inventory is kept on the Rollaway Cart you know where it is and it's easy to load and unload.
 3. When the Cart is overhead nothing gets fiddled with.
 4. Every month you are paying for open wall space that could be used for optimal storage. Your empty walls suddenly become very valuable.
- The Rollaway Cart is made of steel, ships flat and features smooth rolling wheels.
 - All Wall Mount Lifts do the same thing, they go up and down. They are simple, reliable and strong.
 - Because the Wall Mount Lift is an 'electric appliance' not a 'building improvement', you will enjoy a nice tax break
 - Every Lift is made with pride in the United States of America.
 - Your satisfaction is guaranteed.

How does it work?

1. The Rollaway Cart mounts onto your wall so there is no need for a remodel. You don't even have to move your existing shelving.
2. Push the keyed button and the Rollaway Cart comes right down to you.
3. Unlatch the cart and roll it onto the sales floor. You can also roll the cart to the delivery trucks for direct loading.
4. Roll back to the lift and reattach it to the lift.
5. Push the keyed button and up it goes.
6. When the lift is up you can relax knowing your inventory is safe and secure because no one can tamper with it. Your aisles stay open and clear.
