

Automated Vertical Storage

Work Smarter with Tire Carousels!

- Cost effective storage solution
- Maximizes available storage by utilizing *overhead* space
- Accommodates tires up to 33" in standard models with or without rims
- Saves up to 80% of floor space
- Improved security with optional security gates
- Customize size and features to your specific needs
- Ideal solution for tire warehouses, tire retailers, and both automotive dealerships & service centers!

The Tire Carousel is a motorized vertical carousel designed for high density storage & retrieval of tires. This storage system will maximize your overhead space - saving up to 80% of your floor space - with every tire accessible at the touch of a button!

The Carousel's carrier feature is made up of 3 pipes in a triangular configuration. The tires sit at the bottom, with the top limiter bar providing support and a visual for tire sizes that will fit in the carousel. Tire dividers can be placed on the top bar to separate types of tires. Each carrier comes standard with 2 tire dividers.

Tire Carousels

- Point-of-use storage for quicker retrieval times
- Eliminate the need for ladders and other unsafe storage practices
- Perform complex or strenuous tasks via smart machinery
- Simple design and operation; easy to use controls
- Durable & aesthetic powder coated finish
- System can also benefit trucking companies, junkyard dealers, and more

The tire carousel delivers tires directly to the operator at an ergonomic height, reducing chances of injuries from lifting, bending, and pulling at dangerous positions.

Specifications:

Height: 9'1" - 24'

Width: 4' - 18'

Depth: 6'7"

Max tire diameter: 33"

Product Weight
Capacity: 12,000 lbs.

Max out-of-balance
load: 2,000 lbs.

Cage fronts provide added security
