Keys

Matrix Protector is a revolutionary system which enables a secure storage of weapons, ammunition, patrol units, walkie-talkies, keys, phones and others while the access to each item is fully controlled.

The system helps you to stay in control over your inventories and enables you to receive real-time information such who took what, when and for which purpose.

How does it work?

Identification

The system and drawers are normally locked. After identification process, the system will allow or deny access to the software

Identification options:

fingerprint | proximity card | username + password

Selecting an item

Each user can select only items for which he is authorized for. Other items are restricted

Selective access

Each item is stored in a separate sealed compartment. After the selecting an item, the drawer will open and the specific bin that contains the selected item will pop-up automatically.

The rest of the stored items remain secure

Documentation

Every operation is automatically documented and even captured by dedicated wireless camera. In less than 20 sec you will be able to watch any operation performed

Limited access to the specific item

The system enable you to decide which users will be able to access each stored item, when and for which purpose. The access to unauthorized items will remain restricted!

Determine due date

With *Protector* you can easily determine a due date for each item so the system will automatically send an alert if the item has not returned on time.

The alert will be sent to the user how holds the item, his manager and any other persons you define

Accurate recorded and documentation

Protector provides the highest level of security and allows you to video capture every transaction using a dedicated external wireless.

Cross-cutting reports can be easily produced according to your preference

Advantages

- ✓ Saving human resources - **The system function independently**
- ✓ Controlled access - **Limited access for authorized only**
- ✓ Immediate detection - **No searching time**
- ✓ Stay in full control - **Constant awareness, no lost items**
- ✓ Increased availability - **Manage the duration of each usage**
- ✓ Automated documentation - **High standard documentation for years**

Alerting system

Biometric identification

Wireless security system

UPS backup

Alarm system

Locked drawers

Wide rang of sealed compartment

Massive Metal structure
Over 250 kg

Vibration sensor

Maximum Security

Security scenarios

scenario	Send alert to system manager	Send alert to 6 persons	Siren alert	Security camera recording	Stand-by mode
Failed log-in attempts	✓	✓	✓	✓	✓
Drawer opening by forced (burglary)	✓	✓	✓	✓	✓
Drawer remains open	✓	✓	✓	✓	
Pounding / Shaking	✓	✓	✓	✓	✓
Item didn't returned on time	✓	✓			
Power cut	✓	✓			

Remote connection

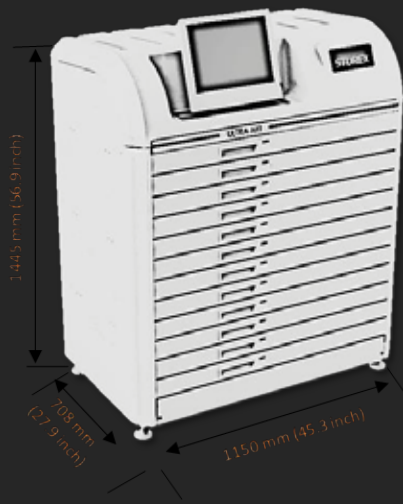

Connect to the system from any remote station:

- Granting / denying authorization
- Generate reports and watch videos
- Block users
- Determine items due date

models

ULTRA

COMPACT

Storage Compartments

Each drawer can be customized by selecting any combination of 12 different compartments.

The capacity is an outcome of the selected size of compartments

5X5

Up to 2,400 compartments in ULTRA unit

15X5

Up to 460 compartments in ULTRA unit

15X15

Up to 150 compartments in ULTRA unit

15X20

Up to 70 compartments in ULTRA unit
