Racks

Hygienic

- ◆ Smooth and easy-to clean surfaces
- ◆ Modules can be removed for cleaning
- ◆ Tubes are galvanized and powder-coated to prevent rusting

Clear and well-organized

- ◆ All modules can be subdivided individually and flexibly
- ◆ Label holders enable the modules and compartments to be clearly identified

Safe

- ◆ Stable construction with cross-supportable top and bottom
- ◆ Stop function prevents modules from accidentally falling out when pulled

Dimensions

- ◆ Compatible with ISO standard
- ◆ For modules sized 60x40cm

Flexible

- ◆ Plastic rails and modules can be removed and replaced as required
- ◆ With countless drawer-dividing possibilities, the compartments can be ideally adapted at any time to the articles stored and storage space can be used efficiently
- ◆ All racks can be supplied with/without wheels

Easy to use

- ◆ Plastic rails can be positioned without tools
- ◆ Basket can be angled to provide easier access to the stock at the top of the racks
- ◆ Plastic rails may be replaced with telescopic slides for heavy loads

Racks

Steel, galvanized, and then powder coated; higher corrosion resistance compared to chrome wire shelving or flat shelving.

Mobile Dense Storage System

Pegasus Racking System can be implemented as dense mobile system using dedicated dollies and track system for floor installation.

The mobile dense storage system is the optimal solution in places where the floor space is very limited but the storage capacity demand is high.

The system can be customized and ordered upon special demand.

Ordering Example for standard U Type Rack

- 2X F74-U - Side frame
- 1X LS-U - Lateral support set
- 9X R60LH - Plastic rail left horizontal
- 9X R60RH - Plastic rail right horizontal (USA: 9XBR-U-H)
