HEALTH SOLUTIONS

EFFICIENCY IN HEALTHCARE STORAGE

Adapting Healthcare Spaces for the Future

Within the healthcare market, spaces need to be adaptable, efficient, and environmentally conscious. Spacesaver aligns with this vision, providing tailored storage solutions that enhance patient care, streamline operations, and ensure compliance with evolving regulations.

Enhancing Storage Efficiency for Healthcare Facilities

The foundation of Spacesaver's impact lies in enabling hospitals, clinics, emergency rooms, and other medical facilities to optimize storage, maintain cleanliness, and efficiently manage inventory. Our solutions create flexible storage spaces that address the stringent needs of inpatient pharmacies, record management, and medical supplies.

Hospitals and Clinics often find themselves outgrowing spaces as they evolve. Our High-Density Mobile Shelving systems address this issue, creating flexibility and adaptability to reclaim lost space, expand inpatient offerings, and adhere to regulatory standards.

ADVANCING HEALTHCARE STORAGE:

Your Partner in Optimizing Space

Within the confines of healthcare facilities, space remains a critical asset. Healthcare facilities continually face the challenge of efficiently managing storage of a wide array of materials. Spacesaver's High-Density Mobile Shelving systems are the perfect solution to accommodate these items while providing a comprehensive approach to a lack of usable space.

Records Storage

Despite the continued growth of digital storage options, there is still a strong demand for physical records storage within today's hospitals and clinics. Spacesaver's High-Density Storage Shelving systems allow users to store more in less space, keeping sensitive patient information secure and accessible.

Temperature Controlled

Spacesaver understands that cold storage is expensive storage and a full cooler is a more cost-effective cooler. Our High-Density Mobile Shelving systems can double the storage capacity for vital medications and specimens within your cold storage area without having to undergo a costly expansion.

Sterile Storage

Spacesaver's high-density sterile storage solutions are a valuable resource for hospitals and clinics whose storage space is at a premium. Our High-Density Storage Shelving systems allow you to store supplies in a clean and organized environment, promoting patient health and employee well-being.

ADVANCING HEALTHCARE STORAGE:

Your Partner in Optimizing Care

Spacesaver transforms healthcare storage, offering solutions that optimize the way healthcare facilities manage their supplies and resources. Our commitment is a strategic approach to enhance patient care, streamline operations, and foster the well-being of healthcare professionals. Explore our healthcare storage solutions, specifically designed for flexibility and operational efficiency.

Day Use Lockers

Providing secure and customizable storage solutions for workplace flexibility, Spacesaver's Day Use Lockers offer the perfect solution for offices or locker rooms within the healthcare facility for each and every staff member to feel confident that their personal belongings will be safe and secure during their shifts. Beyond staff members, Spacesaver's Day Use Lockers give patients and their visitors a safe place to store items during procedures and visits to the facility.

FreeStyle® Personal Storage Locker

Locker rooms for healthcare personnel are a design element in their own right and have become a core facet of recruitment and retention efforts. Offering personalized reconfigurable options, Spacesaver's FreeStyle® Personal Storage Lockers create spaces for rejuvenation and show staff they're valued.

ADVANCING HEALTHCARE STORAGE:

Your Partner in Regulation

Spacesaver's Pharmacy storage solutions are designed to help you make the most of your limited space. We offer options that promote better organization and management of medication supply and security, and improve your workflow by giving your staff fast, direct access to pharmaceutical storage.

FrameWRX® Storage System

Utilizing our highly modular and fully flexible FrameWRX Storage System, you can hang storage bins, tray-style shelves, and pegs to maximize your medication storage. Its versatile design allows shelving options to change with you, especially as regulations, needs, and spaces evolve.

High-Density Mobile Shelving

Spacesaver's High-Density Mobile Shelving systems can help to free up valuable space where expansion may not be possible. This recaptured space can be used to create clean rooms and USP 800 compliant pharmacy storage space - minimizing the risk of exposure for healthcare personnel and patients within the environment.

Evidence Lockers

Spacesaver's evidence storage solutions ensure the secure and documented handling of critical evidence collected at healthcare facilities, enhancing the integrity of criminal cases while maintaining secure access for authorized personnel.

A PROVEN EXAMPLE OF ADAPTABILITY AND COMPLIANCE

+ *The Maisonneuve-Rosemont Hospital in Montreal faced challenges when balancing safety, security, and financials. Spacesaver's Evidence Lockers with ControLoc Technology® provided a secure system that offered accountability through electronically documented access, aligning with the hospital's need for precision in medication distribution.*

ADVANCING HEALTHCARE STORAGE:

Your Partner in Optimizing Procurement

- + A common challenge in the healthcare market centers on obtaining funding for operational improvements that allow staff members to do their job properly and feel good about their work. Capital projects can include construction of a new facility, as well as expansion, renovation, or replacement for an existing facility or facilities. Evidence lockers, gear lockers, and weapons racks are generally considered capital improvements. If you want to pursue a capital project, you'll probably need to look beyond your typical annual budget for additional funding sources.

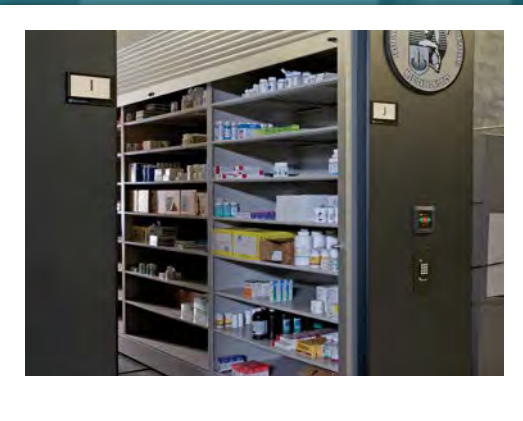

Spacesaver has a variety of contracts, partnerships, and teaming agreements that give you a variety of choices on how to procure your storage systems.

PARTNERS

ADVANCING HEALTHCARE STORAGE:

Your Partner in Optimizing Readiness

Spacesaver is committed to serving Military Treatment Facilities (MTFs) by developing a strong understanding the funding, procurement, and contract processes within military healthcare environments. Our approach involves partnering with trusted resources to provide solutions that align with the guidelines set by the Defense Health Agency (DHA).

INNOVATION FOR A CHANGING FUTURE

ELEVATE YOUR HEALTHCARE EXPERIENCE WITH SPACESAVER

Spacesaver doesn't just provide storage solutions; we deliver a comprehensive set of services that helps to shape the future of your healthcare facility. Our solutions are designed to adapt to your changing needs and deliver efficiency, organization, and accessibility for your facility and staff – allowing them to focus on their well-being and that of their patients.

SPACESAVER ADVANTAGE:

+ EFFICIENCY

Streamline your workflow with quick and easy access to vital supplies.

+ SECURITY

Prioritize absolute security for medications, sensitive records, and critical supplies.

+ ADAPTABILITY

Our solutions evolve with your needs, ensuring long-term efficiency and flexibility.

Spacesaver's nationwide network of local consultants works closely with healthcare providers to design and custom-manufactured systems that perfectly fit their spaces and meet their specific needs. Furthermore, installation and long-term maintenance are managed by local, factory-certified technicians, ensuring seamless integration and ongoing support.

Embark on a transformative journey with Spacesaver, where innovation meets efficiency, security, and accessibility in healthcare storage.
