MOBILE SYSTEMS

ActivRAC® 7MSS

MOBILIZED STORAGE SYSTEM

Mobilize your storage and maximize your space even in the most demanding and harsh conditions.

Easy to install, simple to use, and can withstand harsh corrosive conditions. You truly can do more with less, using the all new **ActivRAC® 7M Stainless Steel (ActivRAC® 7M-SS)** Mobilized Storage System.

To meet the increasing demand for more storage capacity in clean room or corrosive environments Spacesaver has developed the ActivRAC 7M-SS product. The ActivRAC® 7M-SS Mechanical Assist mobilized storage system combines the capabilities of the existing ActivRAC 7M product with all the advantages of stainless steel.

The ActivRAC 7M-SS provides true system flexibility to expand, move, or re-configure as well as the ability to travel over flat, but non-level floors, using patent pending designs and technology. Further, the mobilized storage carriages protect your existing storage investment because they have been designed to accommodate everything from 4-post shelving and drawer systems to cantilever shelving and even light to medium-duty pallet racking.

APPLICATIONS

- Oil & Gas – Coastal Rigs
- Pharmaceutical Manufacturing – clean rooms
- Healthcare – hospital storage and clean rooms
- Food manufacturing
- Freezer/Cold Storage applications
- Shipboard locations

MECHANICAL ASSIST OPERATION
with three-spoked handle with rotating hand knobs for ease of use.

RAIL DESIGN OPTIONS
Unleveled, surface mount or recessed rail.

STORAGE CONFIGURATIONS
Accommodates various pallet racking and shelving.

SOUTHWEST SOLUTIONS GROUP

STANDARD FEATURES

- Stainless steel structure and drive mechanism construction
- Increase corrosion resistance in atmospheric and pure water environments, improved corrosion resistance to most acids, alkaline solutions, and chlorine bearing environments.
- Hygiene – The easy cleaning ability of stainless make it the first choice for strict hygiene conditions, such as hospitals, pharmaceutical mfg., clean rooms, kitchens, abattoirs and other food processing plants.
- 7,000 lbs. capacity per carriage/wheel section
- System flexibility – add on or move carriages to other locations as needed
- Unleveled, surface mount or recessed rail options
- Ergonomic handle with adjustable gear ratios to ensure ease of use, regardless of weight
- Designed to work the existing racking, shelving, and drawer systems
- User activated anti-roll safety lock prevents carriage movement, while aisle is in use
