ART RACK SOLUTIONS

ART RACKS: SIX DIVERSE OPTIONS

Spacesaver's art rack systems offer easy operation and provide an efficient way to store, organize, and display collections. We offer a variety of options: Modular Pull-Out Art Rack, Wall-Mounted Art Rack, Lateral Art Rack, Carriage-Mounted Art Rack, Floor-Supported Art Rack, and Overhead-Supported Pull-Out Art Rack. Systems can be installed on top of existing floors or planned into new construction, and all of our products are engineered and manufactured of heavy-duty steel in Wisconsin, USA.

MODULAR PULL-OUT ART RACK

Mod-Glider Pro™ Modular Art Rack System combines smooth operation with versatile storage capacity. Its pullout screen loading is transferred directly to the floor, allowing for smooth and uninterrupted operation. Our Free-Standing Modular Pull-Out Art Racks can be installed without permanently affixing them to ceilings, walls, or floors. When increased storage capacity is required, clients can add additional modules to accommodate growing collections.

Features & Benefits

- Fully "kitted" with everything needed – no need to consult an engineer or connect to building infrastructure
- Starters and adders (from a single system to a run of multiple systems, the perfect solution for both small-scale and large-scale projects)
- Unloaded pullout art screens require no more than 15 lbs. pull force to start and continue screen-extension motion prior to loading
- Innovative slide design that is lubricant-free, offers full extension, and has a floating slide with dust cover or debris shield that minimizes vibration for smooth pullout art screen movement
- Purpose-built accessories give you the flexibility to easily hang and display a wide array of collections of varying shapes and sizes
- Double-sided Screen Options: Welded Wire and Punched Triangle

Please refer to tech data sheet for system size and configuration options

Fully Extended

Single System with Adder

WALL-MOUNTED ART RACK

Art racks can be installed directly onto walls; this option is particularly helpful when large works need to be stored.

Features & Benefits

- Virtually unlimited size; we have produced screen assemblies up to 10' x 65'
- Available in 1" increments in punched screen; 6" increments in woven wire
- Screen Options: Woven Wire or Punched (Horizontal Diamond, Vertical Diamond, or Rectangular)

LATERAL ART RACK

Floor-mounted lateral art racks provide convenience and flexibility, helping maximize space while protecting hanging art.

Features & Benefits

- "Standard" sections are 5' tall by 10' long and can be stacked in 1, 2, or 3 sections
- Available in 1" increments in punched screen; 6" increments in woven wire
- Can be up to 12' tall with engineering review (oversize installations require overhead anti-tip stiffeners)
- 16' is the maximum length for manual installations; applications up to 24' require mechanical assist
- Wheel sections can be nested for maximum density (shown below) or non-nested
- Roller guide-bearing wheel assemblies
- Uses L-Rail, which results in a small gap on either side of the rail for hooks and rollers
- All wheel sections come equipped with in-rail anti-tip
- Screen Options: Woven Wire or Punched (Horizontal Diamond, Vertical Diamond, or Rectangular)
- No accessories come standard
- Optional Accessories: Handles, Trays, Shelves (with or without lip), Textile Brackets, and Laminate End Panels
- Must be double-sided

CARRIAGE-MOUNTED ART RACK

These art racks can be mounted on mobile carriages and integrated into compact storage systems with other Spacesaver specialty storage units.

Features & Benefits

- Available in 1" increments in punched screen; 6" increments in woven wire
- Canopy tops available
- Compatible with Mechanical Assist and Powered Eclipse
- Includes carriage filler (to conceal internal components)
- Closure panels (to conceal operating mechanism) sold separately
- Carriages sold separately
- Screen Options: Woven Wire or Punched (Horizontal Diamond, Vertical Diamond, or Rectangular)

FLOOR-SUPPORTED PULL-OUT ART RACK

When the floor can handle the weight of the unit and stored artwork, this is the best option.

Features & Benefits

- Available in 1" increments in punched screen; 6" increments in woven wire
- Overhead unistrut (sourced by distributor) provides stability and guidance
- Center-flange rail allows for smooth floor (no gap between rail and flooring)
- Optional B-rail dual-flange guidance
- Screen Options: Woven Wire or Punched (Horizontal Diamond, Vertical Diamond, or Rectangular)

OVERHEAD-SUPPORTED PULL-OUT ART RACK

Spacesaver's Hang-Glider Pro®, ceiling-suspended, pullout storage panel systems are used to safely store, access, organize and protect framed art and cultural artifacts. A single polyurethane tracking wheel at the leading edge of each rack provides guidance, eliminating the need for rails.

Features & Benefits

- Available in 1" increments in punched screen; 6" increments in woven wire
- Overhead aluminum track; two sides of room can share track
- Overhead unistrut (sourced by distributor) provides stability and guidance
- Handle included
- No rails required
- Screen Options: Woven Wire or Punched (Horizontal Diamond, Vertical Diamond, or Rectangular)

NOTE: Client is responsible for consulting with architect and/or structural engineer to ensure ceiling's capability of supporting loads imposed by the Spacesaver system.

SCREEN OPTIONS

- Welded Wire Style:**
 Capacity: 5 lbs./SF per side
Only available on Modular Pull-Out Art Rack
- Triangle Punched Style:**
 Capacity: 10 lbs./SF per side
Only available on Modular Pull-Out Art Rack
- Punched Screen Styles:**
 Horizontal Diamond, Vertical Diamond, and Rectangular Punched screen is available in 1" increments
 Capacity: 10 lbs./SF per side
- Woven Screen Styles:**
 (Standard) available in Horizontal Rectangular
 Woven screen is available in 6" increments
 Capacity: 5 lbs./SF per side
