SOUTHWESTSOLUTIONSGROUP

# PERSONALIZE YOUR PRECINCT

## EVERYTHING CHANGES:

PEOPLE. EQUIPMENT. STORAGE REQUIREMENTS.

Here's a locker system that changes just as fast. Start with sizes that fit your space and configurations that meet your demands. Then include a range of accessories that adapt to your needs. The FreeStyle® Personal Storage Locker from Spacesaver is the **only on-site, end-user reconfigurable locker of its kind.**

Make it your own – it could be the last locker system you'll ever need.

# MAKE TOUGHNESS A REQUIREMENT

## **RUGGED, DURABLE STEEL CONSTRUCTION: BUILT STRONG FOR LASTING VALUE.**

Strength is designed into every aspect of the FreeStyle® locker - in every weld, every steel component, and every moving part.

Take our double-wall welded doors. We call them the industry's strongest doors. You'll call them slam-proof because they're built that tough. So tough, they stand up to continuous daily use without damage or deflection.

## **MAKE YOUR MOVE**

FreeStyle is tough enough to survive years of aggressive use, flexible enough to meet the needs of every individual user, adaptable enough to change when your needs change, and cost-effective enough to fit any budget. Learn more about the last locker you'll ever need.

*Load the FreeStyle locker up with your heaviest supplies and equipment. It can take it. (300 lbs. per shelf)*

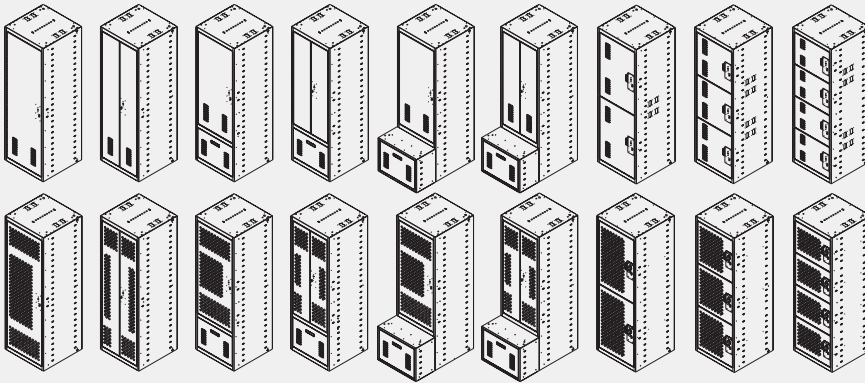

*FreeStyle's double-wall doors can withstand this officer's 280 pounds of force without compromising the integrity of the construction.*

# FLEXIBLE

## RANGE OF SIZES AND OPTIONS

FreeStyle® adapts to your needs and your space, from the start. It is available in a full range of dimensions: with five heights from 66 to 96 inches, four depths from 18 to 36 inches, and seven widths from 12 to 42 inches.

FreeStyle is available with an external access drawer or a bench drawer; with single or double, plain or diamond perforated doors; and a broad range of accessories and lock options.

# MAKE CHOICES WITH CONFIDENCE

## ONE LOCKER: HUNDREDS OF POSSIBILITIES.

### ADJUSTABLE ACCESSORIES

Unique design allows infinite custom configurations and adjustments. Many options are available, including magnetic mirrors, boot trays, and standard pegboard-designed doors.

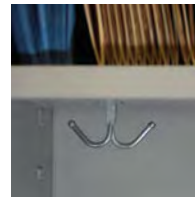

**Document Holder**  
Door mounting allows easy access to documents and notebooks.

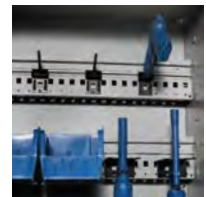

**Modular Shelf**  
Available in 12" and 24" heights. Add accessories to further compartmentalize and customize the locker.

**Lockable Box Kit**  
Use this kit and add a lock to store handguns and other valuables.

**Hook Kits**  
Add single hooks to the side of the modular shelf or a double-hook to the bottom for more hanging storage.

**EZ Rail® element**  
Innovative engineering offers flexible storage of hanging bins, slat wall accessories, and weapons storage components.

**Support Rail**  
Use with Spacesaver weapons storage components or other specialty storage accessories.

**Universal Base**  
Use in conjunction with the EZ Rail or support rail, and with Spacesaver weapons storage components.

**Internal Drawers**  
6" and 9" high drawers offer more custom space, and are available in locking or non-locking configurations.

**Adjustable Shelf**  
Available in standard and heavy duty capacities for storing everything from clothing to ammunition.

**3-Hook Bracket**  
Hook bracket can be moved up and down, and from one side of the locker to another.

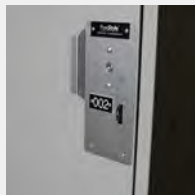

### TAKE CHARGE

All lockers are designed for modular plug-and-play electrical components to bring power to lockers for chargers, shavers, laptops, and other devices. Add power now or later.

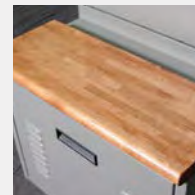

### Lock Options

Lock options include a variety of mechanical and digital keyless locks.

### Solid Bench

Solid butcher block bench provides durability and aesthetics.

### Interlock System

All bench and external access drawers automatically lock and unlock with the door. These drawers feature 200 lb. ball bearing slides.

## AIR EXTRACTION READY

All full-height lockers and accessories include a number of standard features which naturally promote air circulation through the locker. Add air extraction mechanicals now or later.

- **Accessory Spacing:** To promote airflow, all accessories are positioned away from the rear locker panel.
- **Built-in Air Baffle:** Adjustable vent enables lockers to be balanced for air circulation after installation.

**Visibility/Circulation**  
Diamond perforated doors offer visibility as well as natural air circulation and ventilation.

**Adjustable Shelf with Integral Garment Hanger**  
Provides clothing separation for better drying.

**Louvered Shelf**  
For ventilation and drying – great for body armor.

**Ventilation Rack**  
Sliding rack that sits in bench drawer for ventilation.

**Louvered Doors and Drawers**  
Louvers help direct optimal air circulation.

## DIGITAL KEYLESS LOCK OPTIONS

Integrating modern technology with proven dependability, our lockers are compatible with several of the leading digital keyless locks. Further extending this integration, some of our lockers incorporate smart locking mechanisms that allow users to easily access stored materials and optimize facility management through data tracking capabilities.

**DIGILOCK NUMERIS ASPIRE KEYPAD LOCK**

**OJMAR OTS<sup>®</sup> ADVANCE**

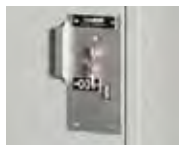

**DIGILOCK NUMERIS ASPIRE RFID LOCK**

**OJMAR OCS<sup>®</sup> PRO**

## MECHANICAL LOCK OPTIONS

Proven, durable lockers that utilize analog locking mechanisms, our lockers deliver secure access to your belongings through a key, combination, or hasp function.

**KEYED LOCK**

**COMBINATION LOCK**

**HASP ONLY (FOR PADLOCK)**
