

APARTMENT & CONDO STORAGE SOLUTIONS

Parcel Lockers

Electronic package locker systems provide an easy way to manage incoming deliveries for apartments, condos, and dormitories. Property managers can eliminate the time-consuming management of packages and notify residents when deliveries are ready for pick up anytime during the day or night. We offer two package locker solutions for you to choose from. First, we have a fully automated solution designed to specifically meet your unique needs and requirements. This is the easiest and most user efficient system to securely manage and distribute packages to your residents. Second, we offer basic parcel lockers on our online store. This is a semi-automatic solution with a lower investment price that still meets the basic needs of the fully automated parcel lockers.

Bulk Storage Lockers

All-steel bulk storage lockers have been designed to provide maximum security and durability. Cost effective and ease of installation make them the perfect choice for condos, apartments and any facility that requires large, secure storage, available with tops, shelves, backs and bottoms if needed.

Standard sizes: Width - 3' & 4' Depth - 3', 4' & 5' Height - 7' 6"
Custom sizes available.

Bike Storage

Bicycles are notoriously difficult to store and take up a lot of space. Wall mounted bike brackets improve organization, safety, and save space by hanging bicycles vertically instead of using your floor area. Users can easily access stored bicycles without damaging other bikes stored on the brackets.
