

SSG Horticulture delivers end-to-end facility solutions for the cannabis and controlled environment agriculture industries. Combining more than 57 years of project execution expertise with a curated portfolio of industry-leading technologies, SSG provides a single source for the equipment, infrastructure, and operational systems required throughout the entire horticulture value chain.

BIM

- Visualize your entire cultivation facility in 3D before construction begins
- See how irrigation, benching, lighting, and all equipment integrate throughout your facility
- Optimize workflows and equipment placement before installation
- Identify layout and utility conflicts early to reduce costly rework

Automated Farming

- Automate key workflows from seeding through harvest
- 24/7 AI-powered crop and environmental monitoring
- Robotic crop scouting with advanced imaging technology
- Integrated seed-to-sale tracking, inventory management, and batch traceability
- A scalable platform that grows with your operation, from a single facility to multi-site production

Grow Benches

- Stationary, Rolling, and Tracked options
- 1', 2', 3', 4', 4.5', 5', 5.5', and 6' widths
- Fully customizable lengths and 9"–36" heights
- Ebb & Flow or Expanded Metal Trays
- American-made using American steel and aluminum
- Plant Support (Trellis) Systems available

Vertical Grow Racks

- Up to 24' tall with row lengths up to 70'
- ¼" aluminum frame supports 1,500 lbs. per linear foot
- 4½" stainless-steel wheels
- American-made using American steel and aluminum
- Airflow and catwalk systems available

From cultivation and environmental controls to automation, material handling, storage, lockers, workstations, and facility support infrastructure, SSG guides every phase of the project and ensures successful execution. While manufacturers focus on building products, SSG focuses on building successful operations. Through proven execution, trusted partnerships, interactive product design through BIM modeling, and a relentless focus on customer outcomes, SSG transforms complex projects into reliable, scalable solutions.
