

## Game Changing Solutions: Transforming Athletic Storage Facilities

*Texas Christian University partnered with Southwest Solutions Group to revamp their athletic storage facilities, improving space utilization, organization, and security.*

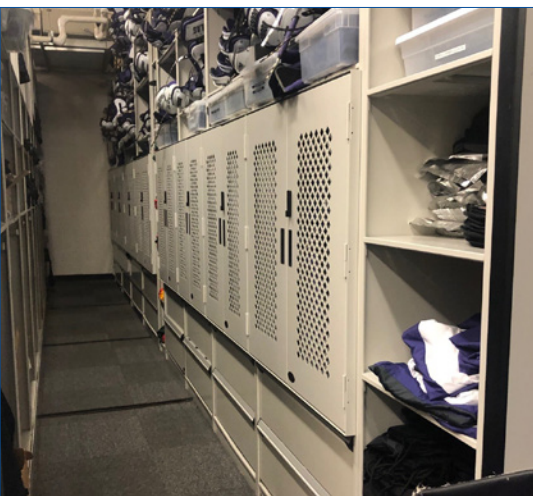

With an athletic department that includes a wide range of sports, Texas Christian University (TCU) was facing a growing problem: inefficient storage. Cluttered spaces, limited organization, and security concerns were all taking a toll on daily operations. To tackle these challenges, TCU teamed up with Southwest Solutions Group (SSG) to create customized, secure storage solutions that would address both functionality and space optimization, ensuring their athletic gear remained safe and easily accessible.

### The Challenge

TCU faced significant challenges in managing and organizing their athletic equipment storage. With a variety of sports and a large volume of gear, the existing storage solutions were insufficient, leading to clutter and inefficiency. Security concerns were heightened due to instances of theft, particularly of high-value items like jerseys.

### Our Solution

Our team of experts SSG stepped in to transform TCU's athletic storage facilities, ensuring both functionality and security were addressed.

## Addressing Security Concerns

Recognizing the need for heightened security, especially following incidents of theft, we introduced storage units with lockable doors and keypad locks. This security measure significantly reduced the risk of unauthorized access and ensured the safety of valuable athletic gear.

## Installing Customized Athletic Storage Units

Our project began with the installation of custom athletic storage units under pre-existing mezzanine spaces. These units featured two-tier drawers and garment rods to maximize storage capacity while maintaining accessibility. We also added additional shelves, ensuring that all equipment was securely stored and easily accessible to authorized personnel.

## Maximizing Space Utilization

To combat space constraints, we implemented innovative 'garage units' that bridged over double doors. This clever use of vertical space allowed for additional shelving and storage without compromising accessibility. These units were designed to be modular, enabling future adjustments and expansions as their needs evolved.

## Innovative Player Cubbies

One of the standout features of our project was the design and installation of player cubbies in the locker rooms. The cubbies were designed to be passthrough, allowing staff to load them from one side while players accessed their gear from the other, enhancing both security and convenience.

## Creating Functional and Versatile Spaces

In the laundry rooms, we installed wall-mounted shelving to provide ample space for drying and organizing athletes' clothing and equipment. Our design also included modular casework for the graduate assistant coaches' offices, offering a practical workspace that could be easily reconfigured if necessary.

## Key Benefits of SSG's Solutions:

**Maximized Space Efficiency:** By implementing custom athletic storage units and innovative 'garage units,' we effectively utilized vertical space, allowing more storage capacity without compromising accessibility.

**Enhanced Security:** Installing lockable storage units and keypad locks significantly reduced unauthorized access and protected high-value items like jerseys from theft.

**Improved Organization:** The addition of two-tier drawers, garment rods, and wall-mounted shelving helped keep athletic gear neatly organized and easily accessible to authorized personnel.

**Versatility and Adaptability:** The modular design of the storage units and casework allowed for future adjustments and expansions, ensuring that the storage solutions could evolve with TCU's changing needs.

## The Outcome

The revamped storage solutions have transformed TCU's athletic facilities, providing a secure, efficient, and organized environment for managing their extensive athletic gear. This project showcases SSG's commitment to delivering customized, innovative solutions that meet our clients' unique needs.

## Ready to Transform Your Space?

The success of the TCU project highlights the impact of smart design and strategic planning. If you're looking to optimize your storage and enhance efficiency, the experts at SSG are ready to help. Contact us at 800-803-1083 to start your transformation and see how we can bring your vision to life!
